

Dear Stockholder,

On April 23rd the Lakeshore Forest Water System Annual meeting was held and Bob Boyd, Mike Nosach and Tony Giacobe were reelected to your Board of Directors to serve two year terms. The composition of the LFWS Board will remain the same.

Ray McCaskill, President 770-532-3378

Mike Nosach, Vice President for Operations 770-843-7227

Scott Pelletier, Field Operations Manager 404-990-1356

Tony Giacobe, Treasurer 770-425-6735

Bob Boyd, Secretary 770-503-0072

Contact any board member to report water system issues.

With the summer high demand season approaching, we thank you for your past help in husbanding our valuable water resource and ask you to continue your thoughtful and conservative use of water this summer. Additionally, it is extremely helpful to the Board when you report any leaks in the system as soon as you are aware of them.

We recently had a leak inside an absent customer's residence and it took us several days to find it. So if you are leaving your home for more than a couple of days, please shut off your water. It will save us water, time, man-hours and perhaps damage to the interior of your home. Little things can mean a lot in water usage. For instance, a running toilet can waste as much as 4,000 gallons of water in a 24 hour period.

Finally, if you have a desire to serve on the board or have a skill set that may benefit our water system, get in touch with us.

Bob Boyd
Secretary LFWS

atch: Water Conservation Tips from the EPA

Water Conservation Tips from the EPA

Did you know that the average U.S. household uses approximately 400 gallons of water per day or 100 gallons per person per day? Luckily, there are many low-cost and no-cost ways to conserve water. Small changes can make a big difference - try one today and soon it will become second nature.

Take short showers - a 5 min shower uses 4-5 gallons of water compared to up to 50 gallons for a bath.

Shut off water while brushing your teeth, washing your hair and shaving: save up to 500 gal a month.

Use a water-efficient showerhead. It's inexpensive, easy to install, can save you up to 750 gal a month.

Run your clothes washer and dishwasher only when full. You can save up to 1,000 gallons a month.

Water plants only when necessary.

Fix leaky toilets and faucets. Faucet washers are inexpensive and take only a few minutes to replace. To check your toilet for a leak, place a few drops of food coloring in the tank and wait. If it seeps into the toilet bowl without flushing, you have a leak. Fixing it or replacing it with a new, more efficient model can save up to 1,000 gallons a month.

Water outdoors only as fast as the soil can absorb it and during the cooler parts of the day to reduce evaporation.

Teach your kids about water conservation to ensure a future generation that uses water wisely. Make it a family effort to reduce next month's water bill!
